The **Nexus Emergent Attention Lab** ([http://www.attention-lab.net/](http://www.attention-lab.net/)), headed by Prof. Leonardo Chelazzi, located at the University of Verona (Italy), is searching for a **Postdoctoral Researcher** interested in studying the behavioural and neurophysiological correlates of visuo-spatial attention. Specifically, attentional control signals and their neural substrates, as well as mechanisms of distractor suppression will be investigated. Studies will be conducted in healthy human volunteers and will entail the application of Electroencephalography (EEG/ERPs).

**Desired qualifications include:**

- PhD in Neuroscience, Cognitive Psychology or in related fields;
- Proven experience in the use of EEG/ERPs systems;
- Proficiency and independence in analysing EEG/ERPs data;
- Strong background in conducting experimental research, documented by papers (published or submitted) in international peer-reviewed journals;
- Proficiency in the English language;
- Good attitude to work in a team;

Positions will be available for an initial 12-month period, renewable for additional 12-24 months. The fellowship amount is open to negotiation with the candidates.
Interested candidates should send a letter of interest, an updated CV, and the names of two references by email to Prof. Leonardo Chelazzi at leonardo.chelazzi@univr.it. Further details on the job opportunity will be available upon request.
